

***BOARDLEY &
ROBERTS LTD***

COMPANY Profile

Established in 1921, Boardley & Roberts has built a reputation for consistently producing top quality rewinds, overhauls, refurbishments and engineering services, fast and efficiently throughout the UK. This reputation has been achieved by our ability to respond and adapt to the ever changing needs of our customers. Our specialist engineers are available around the clock, offering a complete range of Electrical & Mechanical services both on-site and in-house to guarantee minimum down time to all our customers. Boardley & Roberts are a member of the, 'Association of Electrical & Mechanical trades' (AEMT) & the 'Federation of Small Businesses' (FSB). We are proud of our high standards in commitment, knowledge and customer service.

Boardley & Roberts opened their brand new building with over 12,000sq.ft of office and workshop space in 2001 at our original Ipswich location. This purpose built facility has been designed to handle the rewind, refurbishment and repair side of our business, offering capabilities to handle any size of Electric Motor, all types of Pumping units, Generators, Alternators and all other forms of Electrical rotating machinery. Reconditioning, overhauling & repairing of all types of Gearbox and Fan unit with in house machining facilities which include shaft rebuilds, keyway / gear cutting, manufacturing of specialised components, engine head skimming and much more. If the requirement is Electrical or Mechanical, Boardley & Roberts Ltd has the facilities and experience to sort the problem out swiftly and professionally. Our **24/7** service is available around the clock with fully qualified personnel ready to react to your emergency call.

New product sales team, with over 50 years product experience, located at the Ipswich office are available to offer friendly advise or speedy deliveries anywhere in the world of new Electric Motors, Gearboxes, Fan units or Pumping units, available from our extensive on site warehouse or direct from the manufacturers. Boardley & Roberts are a Brook Crompton 'Approved Motor Centre/Stockist' and an 'Authorised Repair Agent'. The Brook Crompton organisation started to manufacture induction motors over 100 years ago and has since grown to be amongst the largest industrial motor manufacturers in the World today. The Ipswich warehouse contains new Motors, Gearboxes, Pumps & Fan units. These are available to all our customers 24/7 and are backed up by our team of experienced, knowledgeable personnel. Whether the problem is an urgent repair, or a new replacement needed, Boardley & Roberts has the ability to solve it.

The workshop has been designed to handle any size of Electric Motor, Fan ventilation or Pumping unit and any other type of Electrical rotating machinery. Whether it requires a complete rewind or just an overhaul, the workshop has all of the facilities for this work to be carried out swiftly and professionally.

W O R K S H O P

Facilities

5t **DEMAG** 331089 01

Boardley & Roberts facilities include a 5 tonne Demag crane, running the full length of our workshops & goods-in/out area.

Making dropping off & collection of heavy items quick and easy!

Our experienced engineering team are fully qualified to repair, rewind, refurbish all types of Motor, Pump, Fan & Gearboxes.

Electric Motor

REPAIR SERVICE

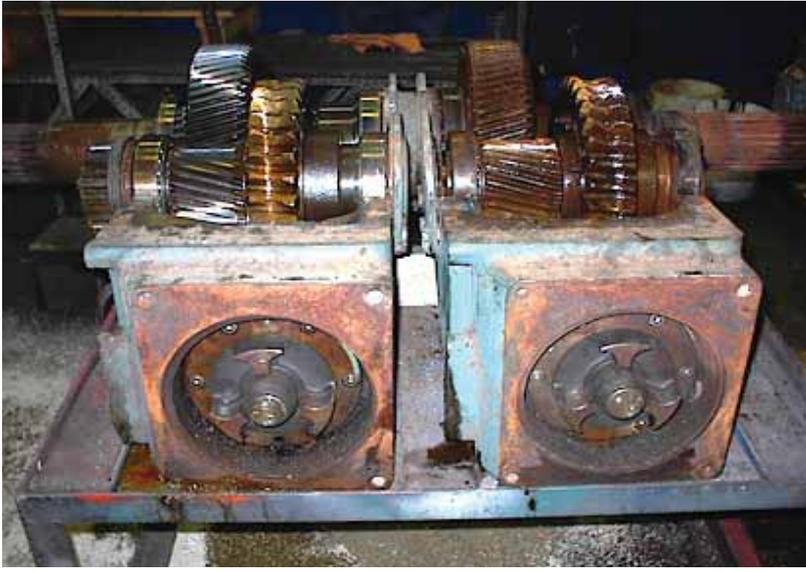

Boardley & Roberts specialise in the complete rewind of all types of A.C. Rotating machinery.

D.C. electric motor repairs & armature rewinds

Fully Certified to service
FLAMEPROOF Ex
apparatus to **AEMT**
standards inline with
ATEX directive

All types of gearboxes from all manufacturers & brands repaired and serviced. Including gear cutting and all machining requirements.

**G E A R B O X
Repair Service**

PUMP

REPAIR Service

Boardley & Roberts Ltd specialise in all types of Pump repairs, rewinds, overhauls & full refurbishments

Large stocks of mechanical seals, bearings & parts held in stock to ensure a fast turn around on repairs.

Panel Building

& INVERTER INSTALLATION

- All panels can be designed to adapt to the customer's requirements.
- Heights, widths & depths can be adapted to suit any space restrictions.
- CAD electrical schematic diagrams will be issued.
- All other documentation including FAT (factory acceptance test), SAT (site acceptance test), method statements, risk assessments & operating maintenance manuals will be provided as required.
- Frequency Inverter Installation/Programming & commissioning

Ask for details

Boardley & Roberts' control panels cover monitoring, instrumentation & factory automation, with designs that are effective but not over complicated. All our panels are built with quality components & engineered to last.

Boardley & Roberts' fully equipped machine shop has personnel with over 40 years experience.

- Reclaiming of motor bearing housings
- Machine & sleeve all rotors & shafts returning them to original manufacturers tolerances

- Manufacturing of shafts, cutting key ways etc
- Plus many other machining services available

Fan Repair

SERVICE

All types of fan units, air handling units, repaired & refurbished.

In house and
on-site
Dynamic
Balancing
service
available.

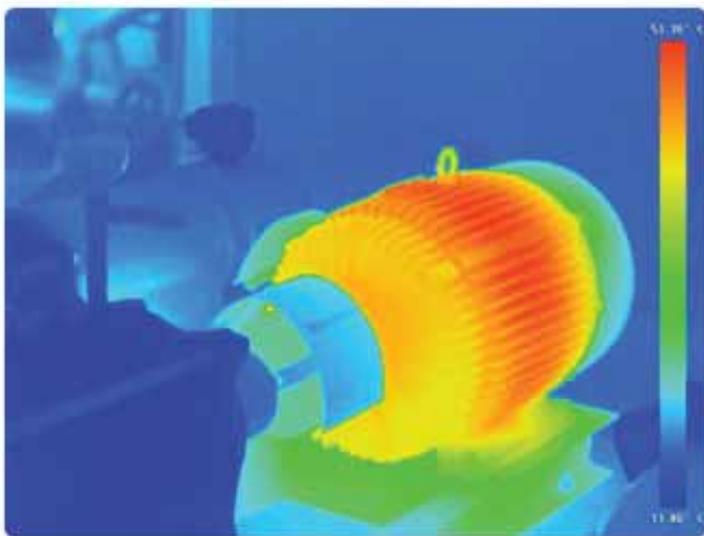

VIBRATION Analysis

Through periodic monitoring of machines vibration, problems such as bearing wear can be detected early enough to permit planned repairs instead of unexpected break downs.

Infrared Thermal Imaging

Infrared Thermal Imaging can detect potentially serious faults before they have a chance to develop. A survey of electrical installations will reveal in seconds any abnormal component temperatures preceding equipment failure. Our highly trained operators can provide this service on a regular contract as required.

PREVENTIVE Maintenance

Our Engineering team has many years experience in all types of plant repairs.

ENGINEERING

Solutions

- The supply, install & commissioning of new plant.
- The removal, refurbishment & refitting of existing plant.
- On site fault finding.
- On site overhauls & repairs to plant.
- Fan Units
- Gearboxes
- Electric Motors
- Air Handling units
- Frequency Inverters
- Pumps & Pressurisation units

On-site Engineering Solutions

ENGINEERING Solutions

Energy consumption contributes to a major cost in anyone's environment, so to stay competitive these costs must be kept to a minimum.

Various green initiatives in the form of government legislation have been implemented including metering requirements and the manufacture of energy efficient electric motors. Therefore knowledge of exactly what energy we are using and where is essential.

We are then in a position to implement saving initiatives such as voltage optimisation equipment, high efficiency electric motors, smart energy saving lighting and altering work patterns to ensure peak charge times are avoided.

W Combustible dust zones 21 & 22
(125 degrees surface temperature)

Brook Crompton offers one of the widest available ranges of electric motor for operation in hazardous atmospheres & hostile environments.

All motors are designed, tested & manufactured in accordance with the latest Euro norm & relevant country standards.

- Full 2 year warranty
- Stainless steel rating & certification plate
- Certification of Grant of Patent on the bearing cap
- All motors fully comply with the requirements of the ATEX directive (94/9/EC)

Power ranges between 0.75kw – 200kw in 2, 4, 6 & 8 pole.

(ask for more details)

A complete range of motors are available to meet with the European Standard for electrical equipment working in dust hazards. The specification takes account of dust present in a cloud in normal operation. Dust is therefore excluded from the motor and only the external surface temperature of the motor is exposed to dust. These motors are available in various sizes on short delivery times.
